

PoC 1 – Sensor Data Reading

- Sensor connected to microcontroller
- Reads real-time data
- Displays on Serial Monitor
- Confirms hardware working

PoC 2 – Cloud Communication

- Microcontroller connects to Wi-Fi
- Uses MQTT protocol
- Uploads data to ThingSpeak/Firebase
- Enables remote monitoring

PoC 3 – Alert Logic System

- Checks sensor values continuously
- Compares with threshold
- Triggers buzzer/LED/relay on limit
